

## Community Notification

Community Notification provides citizens with access to your sex offender registry and allows them to register for alerts when an offender moves into a specified area. As part of this solution, we provide Web site development and support, hosting services for public Web portals and e-mail alerts to the community and other organizations of interest with accurate information about offenders.

### Benefits:

- Radial technology delivers an immediate and easily digested offender population around any specified address
- Personalized community interaction through an automated, user-friendly interface which increases awareness and visibility
- Automated letter generation process saves time and lowers mailing costs
- Accurate information available to the public along with further investigative tools for validating addresses and tracking offenders for law enforcement

### Features:

- **Online portal** system provides the same look of your agency's existing Web site to allow users access to community information, register for e-mail alerts, and track specific offenders.
- **Smart Radial** feature matches the address with an optimum search radius based on the user's area. It automatically analyzes the submitted address and pre-assigns the recommended level.
- **E-mail notification** feature allows users to confidentially register an unlimited number of addresses on the Web portal to be automatically notified when an offender moves into a specified ZIP code.
- **Postal notification** feature prints and mails letters to registered users within the prescribed radius as required by local law, plus institutions on a notification list, within 48 hours of offender registration.
- **Mapping tool** displays all offenders residing within one mile of a specified address. Users can coordinate any unmapped offender addresses by contacting technical support directly. For law enforcement, automated tools allow designated users to query the offender database directly from a map for investigative purposes.

**Arkansas County Sheriff's Office**  
Sheriff Kenneth G. Howard  
110 W. MAIN ST  
WYF 00000, (501) 400-1100  
037 342271
